Motivation Letter for Student Exchange Program

I want to express my strong interest in participating in the Semester Exchange Program in the spring of 2023. I see this as an opportunity to gain valuable experience outside of my comfort zone and look forward to the prospect of an exciting next step in developing myself both personally and professionally.

Currently, I am a bachelor's diploma student enrolled in a Software Technology Engineering Programme. While working on projects in school, I have developed the skill to adapt to every situation I am in and come up with creative solutions to problems that can occur. My class consists of 25 students that came to Denmark to study from the whole Europe. Being in a very international class, I have learned that each culture is unique and each person has their strong sides that one can learn from.

During my bachelor's, I am being as proactive as possible. Since the second semester, I have been working in many companies as a student software developer to apply my studies' learnings to real projects. Part of my studies is an internship that I am currently taking at Qualcomm in Salzburg, Austria. Outside of work and school, I enjoy working on my own projects using technologies that interest me and about which I want to learn more.

I have big expectations from the exchange programme. I am a very open-minded person who loves to experience new things and cultures and gain new knowledge. Meeting new people and making long-lasting friendships and connections is something that I value a lot. Therefore I think an exchange is the best opportunity for me to experience all of this and improve myself both personally and professionally. I am a very driven person who knows that the biggest and hardest challenges are the ones with the most significant learning outcome and the best experience.

Please do not hesitate to contact me if you have any questions about my background, projects or skills. I look forward to the opportunity to speak with you further.

Thank you for your time and consideration.

Sincerely,

Tomas Ondrejka
